

# Project Title:- Test Quiz App

**TECH QUIZ**  
**APP**  
CODE IT! CRACK IT!

Team Member:-

Prashant kumar(Enrl No.: -0103IT161082)

Shubham Patil(Enrl No.: -0103IT161109)

Shivam Kumar(Enrl No.: -0103IT161104)

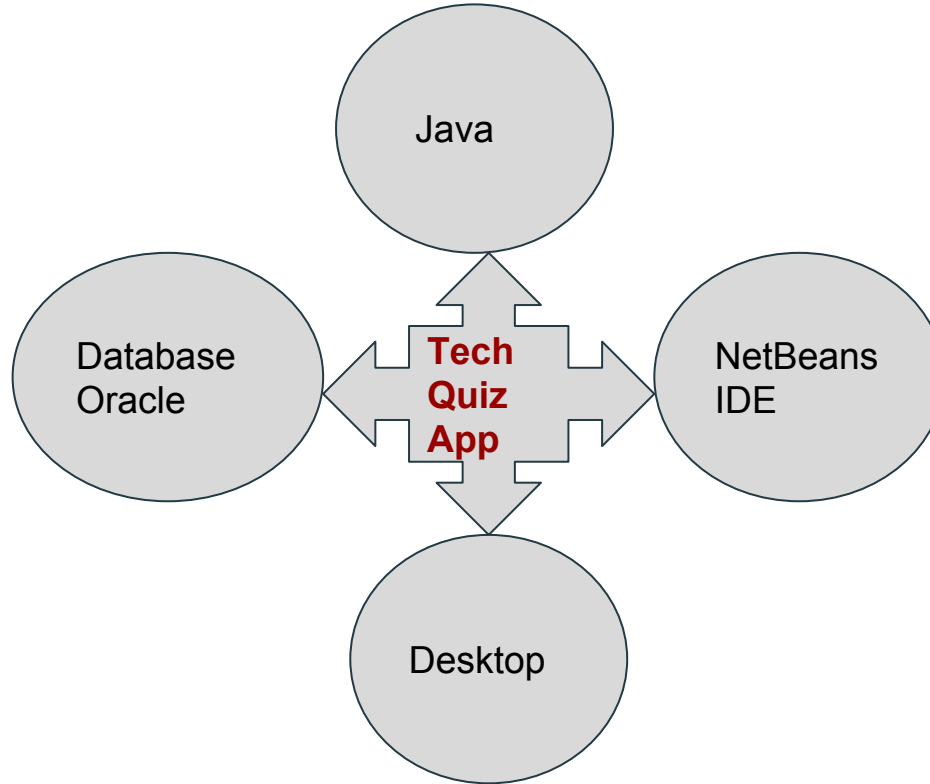

# Introduction:-

1.This is a Desktop application. In this application student can give test in various subject and check there result. Every user has a unique login ID and Password, So they can login with that and give test and can see there result.

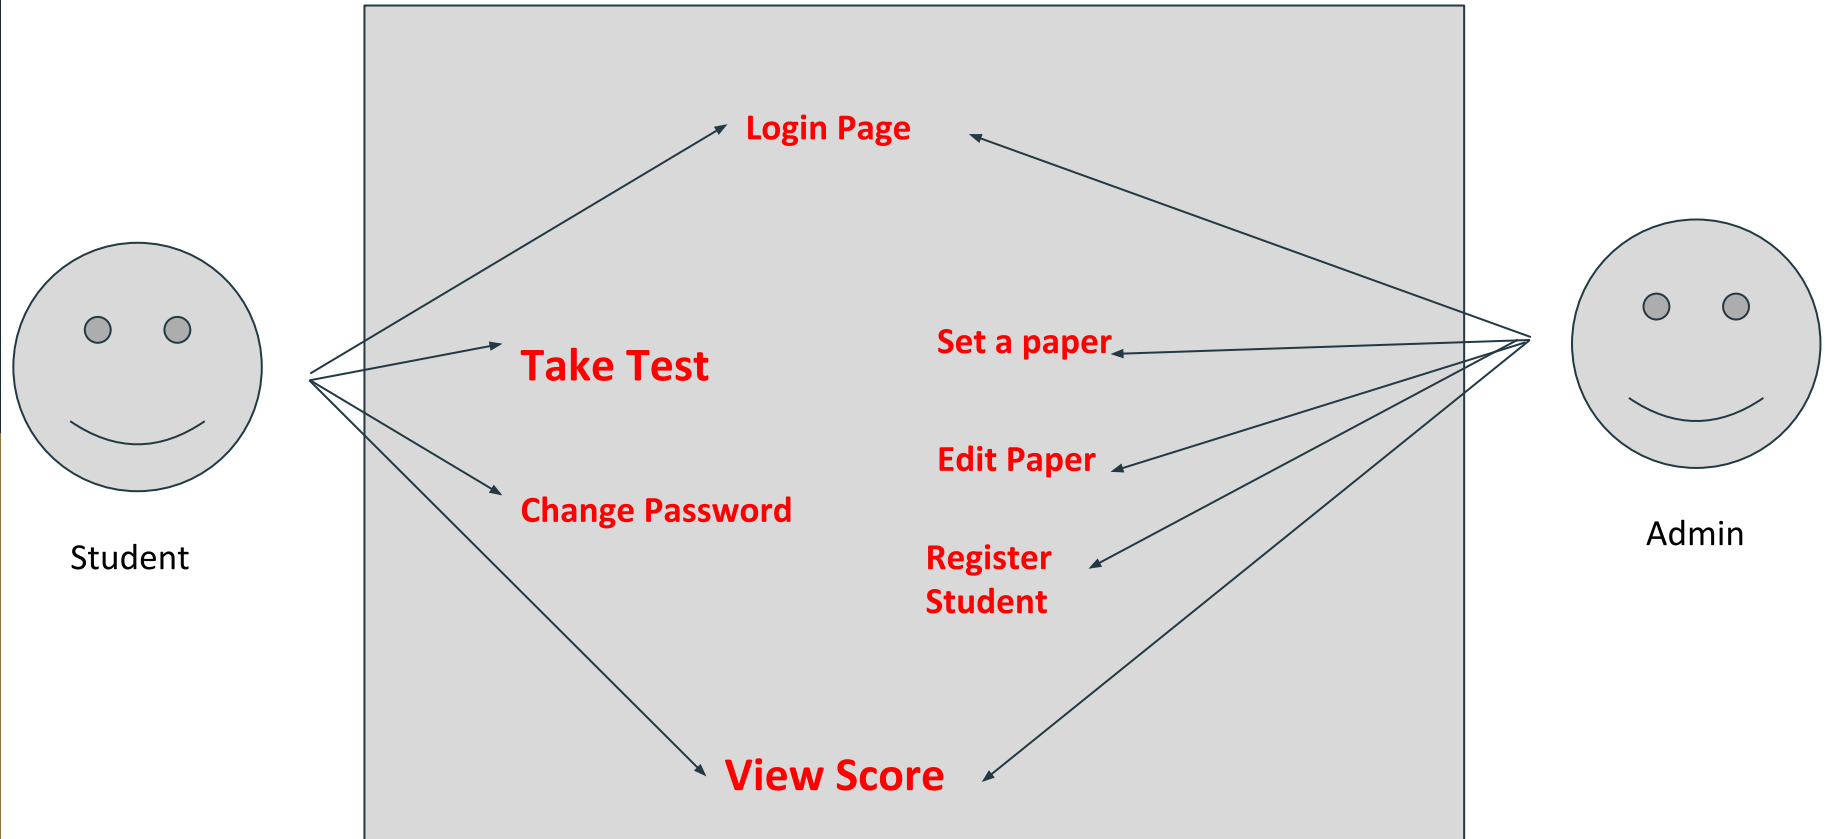

2.In this Desktop app there are two module. First is admin view and Second is user view.

3.In Admin view there are several option like they can add questions, edit question, see all students results and register students.

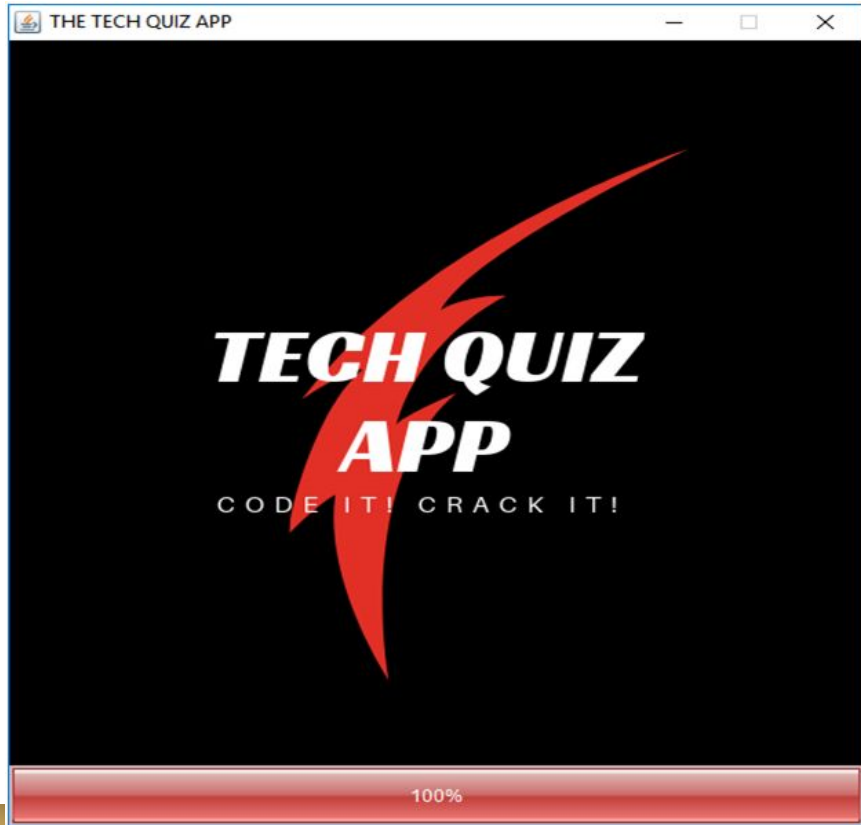

# Tools and Technology :-

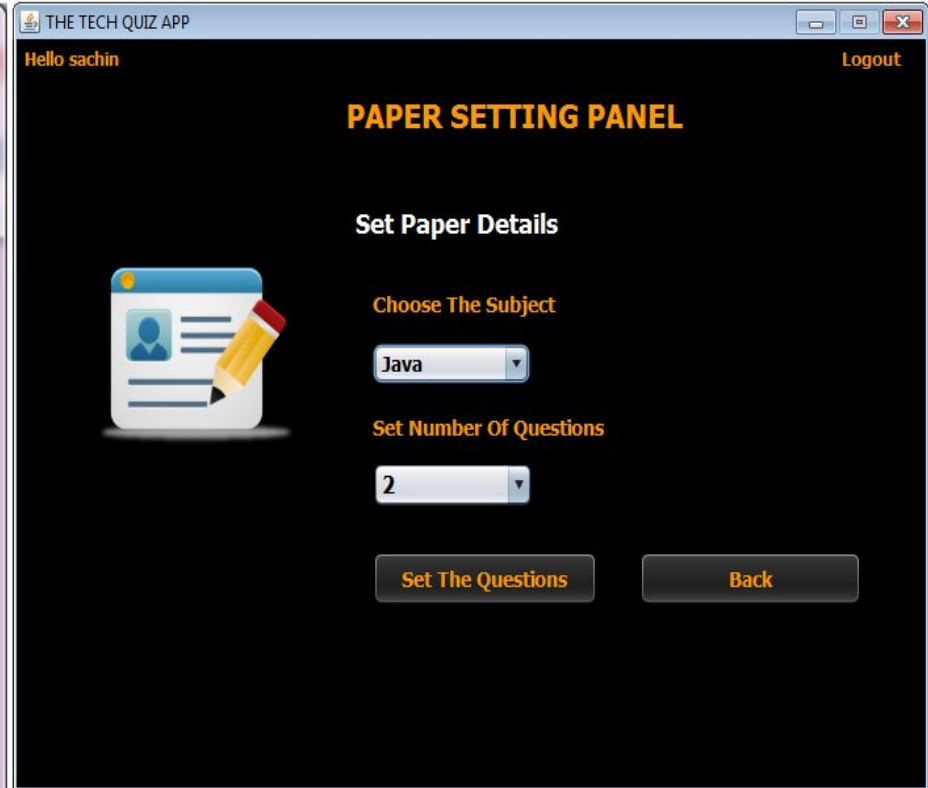

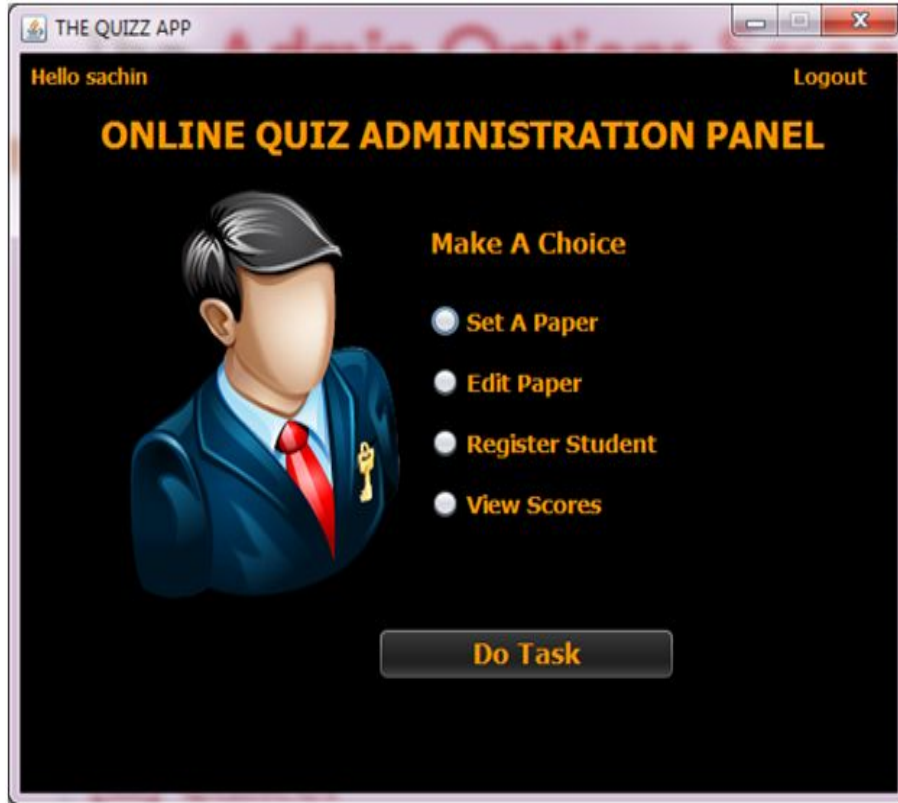

# UseCase Diagram:-

## VIEW SCORES PANEL

Make A Choice

- ☐ View Score Of A Single Student
- ☐ View All Scores

Do Task

Back

# Main Working

The main highlight of the App

Would be:-

- 1.Admin of this app can able to update,delete,insert student and question paper from database.
- 2.In this app student can give test and evaluate their strength.
- 3.Admin as well as student(user) can check result.

# DEPENDENCY

- 1.To access Quiz App a device(System)
- 2.App will be dependent on Database.
- 3.Oracle database is needed for that

# Future Scope

We are intended to make a app for the use of any School or College.

This will cancel their dependency on pen or paper.

We can use this app at a time in multiple system with the help of **socket programming**.

We can take exams, set timer on that and evaluate their marks.

**Thank -You**
